DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 5 and 7 recite a computer program product and computer-readable medium; there is insufficient antecedent basis for those limitations in the claims.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 1 recites the algorithm of how to calculate filter coefficients with no practical application.

Claim 3 recites steps of modifying the vector with no practical application.

Claims 5 and 7 recite "one program module" that directs to non-statutory subject matter.

Claims 2, 4, 6, and 8 are rejected as incorporating the deficiencies of claims 1, 3, 5, and 7 upon which they depend.
